Creating a funeral that's right for you

We'll help you create a funeral that celebrates their life in a way that's right for you and for them.

Once they're in our care, we'll look after them with dignity and respect, while honouring their faith and traditions. We'll help you make decisions, and we'll take care of all the arrangements, calls and documents that need to be done by us and any third parties.

We've been caring for families for over 100 years and we'll be here for you, at your side, whenever you need us.

Sustainability

We know many families want to make choices that are kinder to the environment, and it's no different when arranging a funeral. There are lots of simple, thoughtful ways to reduce the environmental impact without taking away from what matters most. You can choose a coffin made from natural materials like willow, bamboo or sustainably sourced wood, which use less energy to produce and break down more gently over time. Some families prefer a woodland or natural burial ground, where the surroundings stay close to nature. We've got beautiful sites across our trading estate where your loved one can be laid to rest.

We can also help with greener transport options, including our bicycle hearse, and our florists can create stunning tributes that avoid plastic and use more sustainable materials. Whatever matters to you, our team will guide you through every option and help you create a funeral that reflects your values, honours the person who's died and supports the environment at the same time.
